

## **Compressors**

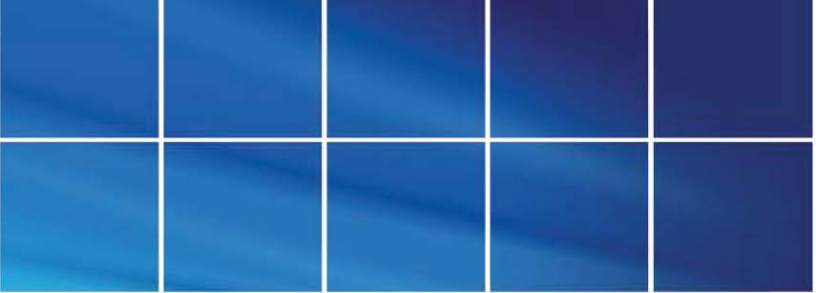

## **Boosters**

## **Exploration Equipment**

***Providing Innovative Solutions to Customers on Every Continent***

**National Compressed Air offers the widest range of high pressure compressors, underground and surface booster compressors and exploration equipment for the mining industry. Our expertise and design flexibility provides our customers with high performance equipment that operate under extreme conditions or in any location**

## ***Reliable Equipment for Any Mining Application***

*From damp underground mines to high mountain elevations, in cold arctic conditions to hot and humid conditions in the Middle East, NCA can offer the design excellence and equipment reliability that has been proven by years of firsthand experience*

## ***Built For You – Built With You***

*By combining our extensive knowledge of various compressed air and drilling technologies with your input on operating conditions, NCA can provide you the compressed air solutions that offer maximum efficiency and reliability for your mining applications*

## ***Your Success is Our Pride***

*At NCA, we take pride in providing solutions that meet our client's specific needs. With our modular and flexible manufacturing techniques along with a substantial inventory of parts we can meet most non standard client requests with little or no impact on equipment price*

## ***Knowledge Mining***

*At NCA, we believe in imparting the maximum knowledge to our customers through specially designed training programs on equipment and processes that help them operate our equipment most effectively. Training programs can be conducted by our factory trained personnel at any location around the globe*

***NCA Helicopter Portable Compressors in operation on a remote mountain site***

## High Pressure Rotary Screw Air Compressors

- Single Stage – Volumes upto 3000 scfm and Pressures upto 220 psig
- Two Stage – Volumes upto 1700 scfm and Pressures upto 500 psig
- Diesel, electric, PTO and other drive options
- Skid base mounted or trailer versions, open frame or with enclosures and container options
- High or Low ambient and elevation capabilities
- Air or water cooled
- Contact factory for many more options or any specific features required

## Booster Air Compressors

- Rotary Screw to 600 psig (41.38 barg) pressure for underground mining
- Reciprocating to 1500 psig (103.45 barg) pressure for mineral exploration applications
- Diesel, electric and various other drive options
- Skid base mounted or trailer versions, open frame or with enclosures and container options
- High or Low ambient and elevation capabilities
- Air or water cooled
- Contact factory for many more options or any specific features required

## Exploration Equipment

- Light weight people portable and helicopter portable configurations for specific requirements
- Atmospheric Compressors
- Booster Compressors
- Exploration Drills
- Track Carriers
- And Much More

## Other NCA Products:

- **Helicopter Portable Compressors**
- **Man Portable Compressors**
- **High Pressure Reciprocating Booster Compressors to 5000 psig (Air or Nitrogen)**

- **Compound Air Compressors to 5000 psig**
- **Drilling Rigs**  
*Man Portable, Helicopter Portable and Track Carrier Mounted*
- **Custom Engineered Compressor Solutions**

National Compressed Air has been an industry leader in custom manufacturing since 1962. By working directly with our customers we design and manufacture quality products that meet their individual needs and ensure successful projects.
